

NEW in our product range!

Plastic components by Elring – Das Original

Heat-resistant lightweights, which are proof against all common conditions in the engine compartment. Despite their low weight, they are rigid enough to scatter the sealing load evenly.

Our components are ready to install including gasket and bolts in proven Elring quality!

Plastic components by Elring – Das Original:

The ElringKlinger OE-competence from the series, custom-fit and dependable – now available for the independent aftermarket. Check out our references for the most popular BMW, Mini, Peugeot and Citroën applications.

Typical failure causes:

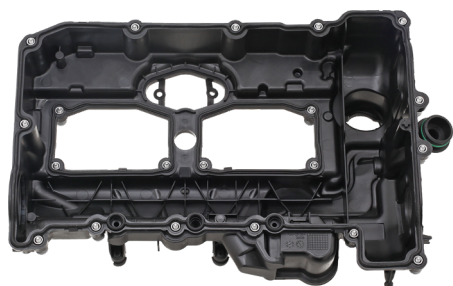

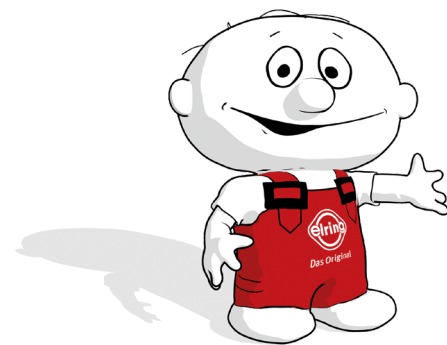

- Improper installation (incorrect torque or wrong tightening sequence)
- Leakage of the related gaskets
- Defective add-on parts (especially in connection with integrated crankcase ventilation valve system (PCV-valve system))
- Damages of fastening points due to material wear

Symptoms:

- Loss of oil
- Rough engine running
- Higher fuel consumption
- Oil sludge contamination
- Considerable smell of oil while engine is running

Advantages of Elring valve covers and oil pans:

- Ready to install
- Material in OE-quality
- For professional and time-saving installation

Important information!

- Disassembly and installation only by skilled and qualified staff
- Improper installation can lead to irreversible damage
- Please pay attention to the attached tightening instructions
